

## ***Chevron Wrap***

The Chevron Wrap is one of the easiest patterns to wrap. This and the diamond is what most people start with. They are also bases for a number of other wraps.

Figure 1 - I start with the color I want to be the top edge of the chevron, in this case yellow (represented as black), and wrap a cross over the center line.

Figure 2 - Now I wrap the next color underneath the original cross up and to the left and down and to the right.

Figures 3 & 4 - I add more colors in the same direction until the chevron is complete.
