

Diamond Chevron Wrap

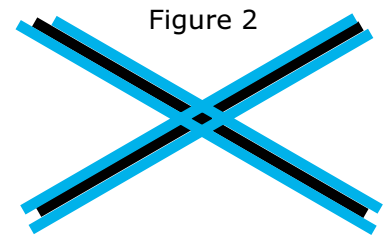

A combination of two simple wraps to create a more complex looking design. Alternating colors on one side and the other will give an even more complex looking design - see the second example picture on the Custom Wrapping Page for the Chevron Diamond wrap.

Figure 1 - I wrap a cross for the center of the diamond over the center line.

Figures 2-4 - I wrap the diamond

Figures 3-7 - I wrap the upper chevron. This is done similar to the chevron pattern except I start from the bottom (at the top of the diamond I previously wrapped) and wrap up.

Figures 8 - I now wrap an identical lower chevron. I start from the top (at the bottom of the diamond) and wrap down using the same thread pattern I used for the upper chevron.
